

# Atomic Design System Manual

## Pangasinan Heritage Digital Showcase • Activity 1.2

### Design principles

Mobile-first, responsive, semantic, keyboard-accessible, readable, reusable, modular, and static-first.

### ATOMS

#### *Button*

Visual preview: Implemented in the source page and shown in the rendered showcase. Rounded primary and outlined actions. Use for navigation and calls to action. Responsive action groups wrap on small screens. Code: components/Button.tsx

#### *Typography*

Visual preview: Implemented in the source page and shown in the rendered showcase. Serif display headings paired with sans-serif UI/body text. Major headings use clamp() for responsive scaling. Code: app/globals.css

#### *Color Tokens*

Visual preview: Implemented in the source page and shown in the rendered showcase. Deep green #17332d, terracotta #bd633e, warm neutral #f7f3eb, supporting green/blue tones. Code: app/globals.css

#### *Icon*

Visual preview: Implemented in the source page and shown in the rendered showcase. PH circular brand mark. Use for brand identification. Fixed 38px size. Code: components/Header.tsx

#### *Image*

Visual preview: Implemented in the source page and shown in the rendered showcase. Landscape destination imagery with descriptive alt text and object-fit: cover. Code: components/HeritageCard.tsx

### MOLECULES

#### *Heritage Card*

Visual preview: Implemented in the source page and shown in the rendered showcase. Destination preview with category, location, description and action. Three columns desktop, two tablet, one mobile. Code: components/HeritageCard.tsx

#### *Search Form*

Visual preview: Implemented in the source page and shown in the rendered showcase. Destination search field and action. Stacks vertically below 800px. Code: components/SearchForm.tsx

#### *Navigation Item*

Visual preview: Implemented in the source page and shown in the rendered showcase. Top-level Heritage/About/Plan a Visit links. Hidden on small screens to keep the header compact. Code: components/Header.tsx

### ORGANISMS

#### *Heritage Grid*

Visual preview: Implemented in the source page and shown in the rendered showcase. Responsive collection of Heritage Cards. Three columns desktop, two tablet, one mobile. Code: components/HeritageGrid.tsx

### ***Header Navigation***

Visual preview: Implemented in the source page and shown in the rendered showcase. Sticky global header with brand and navigation. Responsive navigation behavior. Code: components/Header.tsx

### **Accessibility checklist**

Semantic HTML; labeled search input; descriptive alt text; visible focus indicators; reduced-motion support; touch-friendly controls; strong text/background contrast.

### **Reusable structure**

app/ = pages and global styles; components/ = Atomic Design components; data/ = content model; public/ = static assets.
